- REDUX
- GITHUB

## 📁 PROJECTS

### Pet-shope 📁

#### e-commerce website

2024/02 – present

- Contributed to the development of a fully functional e-commerce website aimed at providing users with a seamless online shopping experience.
- Leveraged modern frontend technologies and frameworks to create an intuitive user interface and ensure optimal performance.
- Combine authentication and authorization featuresTeamed up closely with backend developers to seamlessly integrate using JWT Bearer Tokens for enhanced security.

**User-friendly Interface:** Utilized HTML5, CSS3, and JavaScript to design and develop a user-friendly interface with responsive design principles.

**1. Frontend Technologies:** Take advantage of React.js to develop an active and interactive components, improving user engagement and overall experience.

**2. Authentication Integration:** unite with backend developers to integrate JWT Bearer Token-based authentication, ensuring secure user login and access control.

**3. Dependency Injection:** Utilized dependency injection principles to manage component dependencies and promote code maintainability.

**4. Cart Management:** Implemented separate shopping carts for each user, allowing them to add and manage items seamlessly.

**5. Admin Order Management:** Assisted in the development of an admin dashboard for managing user order details and tracking order statuses efficiently

## 🎓 EDUCATION

### HIGHER SECENDORY EDUCATION

#### Ghss kadanchery

2021 – 2022 | Malappuram, india

I completed my higher secondary education with a focus on Humanities at Govt. H.S.S.
